Alexander Garcia

Full Stack Developer

Gastonia, NC 28054
(980) 233-0280
alexg97343@gmail.com

SKILLS

HTML5, CSS3, JavaScript, jQuery, Bootstrap, React.js, Node.js, MongoDB, MySQL.

Projects

- Drinky Bird Project: This is the link to the page "https://argent-t.github.io/Drinky-Bird/". Drinky bird is a site which allows users to search for cocktail recipes by name, first letter, and by main ingredient. It also provides local bar locations, descriptions, and ratings wherein the user can order the drinks they choose.

- Nutrition Journal: This is the link to the page "https://salty-ravine-80275.herokuapp.com/". Nutrition Log is an application where a user can sign up by creating an account and keep track of their nutrition habits. This app allows you to enter the foods you have eaten and the nutritional facts about that food will be displayed. It also tells you how many calories are in that food. The user can also enter exercise completed and the expected calories to burn will be provided.

  Both of these projects were simply a blast to create. I was in a team of 3 or more developers and we were able to achieve the task on hand.

EDUCATION

UNCC, Charlotte, NC - *Full Stack Developer Program*
October 2019 - April 2020

Independence High, Charlotte, NC - *High School Graduate*
2007 - 2011
